

International Private Line

Dedicated circuits with our dedication to quality

Telmex USA's IPL service provides highly secure and reliable dedicated circuits connecting your business locations across the Americas. This provides a cost-effective solution for the simultaneous, two-way secure transmission of voice, data, video, or any digitally encoded signal. We offer fully managed, digital communications capacity with bandwidth and redundancy options to meet your needs.

This service can help lower your international long distance costs between locations and support private networking. Telmex USA's IPL service is built upon our 100% SDH fiber network, offering the robustness and diversity to serve the most demanding customers in the region, complete with our highly competitive end-to-end SLAs.

- Our state of the art Network Operations Center manages and monitors our service 7x24x365.
- Highly scalable services to meet your growing requirements for bandwidth.
- International coverage, with one single point of contact.

International Private Line

Delivering advanced technology for your business.

- Telmex USA's IPL supports multiple protocols, different speeds and interfaces.
- Our highly available service supports mission-critical applications.
- With redundant connections among the world's leading undersea cable operators, our unique architecture provides superior reliability, reduces delays and avoids single points of failure.

Our International Transmission Network

- Robust and Fully Redundant
- Integrated with Domestic Networks
- Centralized Management

- Together with our affiliates, we operate in the United States, Mexico, Argentina, Brazil, Chile, Colombia, Ecuador, Peru, Uruguay, Central America and the Caribbean.
- Redundancy options provide customizable levels of protection, including the last mile.
- Our highly-trained Network Management professionals proactively monitor our network backbone and services, detecting and resolving problems before they impact service.
- State of the art security helps prevent unauthorized access and network intrusion.
- World-class customer service is available 7x24x365 in English, Spanish or Portuguese.

International Private Line services are part of our full portfolio of products comprised of traditional telephony services, as well as the next generation of data and multimedia services over IP. Together with our affiliates, Telmex USA's international presence, commitment to quality and to customer service enables our teams to provide you with the highest level of service.
